

# GardenSoxx® EZ Filler

*Use with GardenSoxx mesh and local compost to create the best container for growing*

The GardenSoxx EZ Filler is a simple method for filling GardenSoxx mesh in short lengths. Simple to use, especially for children, this makes school and home projects go smoothly. Have a compost mix, potting soil or growing medium you already like? Use any bagged or bulk media to fill your own GardenSoxx. Add a drip irrigation kit for a complete garden, ready to plant!

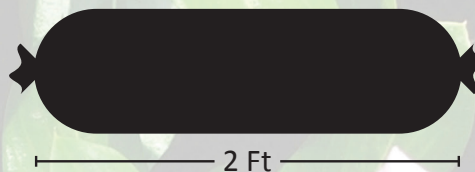

- Use local compost or bagged soil
- Create custom lengths
- Fun and easy for children
- Community gardens
- Backyard gardens

1 cubic foot  
of compost or  
bagged soil

=

## Instructions:

1. Cut GardenSoxx mesh to desired length.
2. Close one end of the mesh with a knot or a zip tie (knot requires 6" of mesh.)
3. Pull the open end of the mesh over the bottom of the EZ Filler.
4. Fill the EZ Filler with compost or soil.
5. Lift the EZ Filler slightly, allowing soil to fall into the closed end of the mesh. Continue until mesh is almost full (leave enough mesh to close the GardenSoxx.)
6. Remove the EZ Filler from the mesh, and close mesh with a knot or zip tie.
